## Advanced Stock Market Trading Bootcamp Curriculum

### Module 1: Advanced Swing Trading with Parrot and Cage Strategy

- **Objective:** Master the strategy for consistent swing trading success.
  - **Key Topics:**
    - Identifying trade opportunities within a 12–15-day tenure.
    - Achieving a 70% win ratio through systematic analysis.
    - Backtesting with historical market data.
  - **Practical Component:** Case studies on recent market trends.
- 

### Module 2: Volume Profile High Beta Trading System

- **Objective:** Enhance trade execution based on volume profile insights.
  - **Key Topics:**
    - Analyzing 30–45-day swing trades.
    - Achieving a risk-reward ratio of up to 1:2.
    - High-beta stock selection for maximum returns.
  - **Practical Component:** Simulated trading sessions.
- 

### Module 3: Renko Trading Mastery

- **Objective:** Capture market trends effectively with Renko charts.
  - **Key Topics:**
    - Setting up Renko charts for optimal trend detection.
    - Techniques to achieve a risk-reward ratio of 1:3.
    - Entry and exit strategies for swing trades.
  - **Practical Component:** Identifying live market trends using Renko.
- 

### Module 4: Advanced Risk Management Strategies

- **Objective:** Minimize risks and maximize trading outcomes.
- **Key Topics:**

- Setting personalized threshold limits.
  - Applying R-Multiple Theory in trading.
  - Using the PCR formula for precision in trade sizing.
  - **Practical Component:** Risk assessment exercises.
- 

#### Module 5: Session Volume-Based Intraday Trading

- **Objective:** Gain confidence in intraday markets.
  - **Key Topics:**
    - Understanding session-specific volume profiles.
    - Planning intraday trades based on volume spikes.
    - Risk and reward calculations.
  - **Practical Component:** Live market analysis during trading hours.
- 

#### Module 6: Sunset Trading Strategy (Intraday)

- **Objective:** Capitalize on market closures for intraday profits.
  - **Key Topics:**
    - Identifying end-of-day trading opportunities.
    - Strategy implementation for quick profits.
    - Handling volatility during market closures.
  - **Practical Component:** Sunset strategy simulations.
- 

#### Module 7: Magic Formula Investing for Portfolio Management

- **Objective:** Build a robust investment portfolio.
  - **Key Topics:**
    - Applying the Magic Formula to identify high-value stocks.
    - Portfolio diversification techniques.
    - Managing portfolios for long-term growth.
  - **Practical Component:** Portfolio review and optimization.
- 

#### Module 8: RSI-Based Advanced Father-Son Trading System

- **Objective:** Optimize futures trading using RSI.

- **Key Topics:**
    - Advanced RSI interpretation techniques.
    - Pairing RSI with other indicators for accuracy.
    - Strategy execution for stock futures trading.
  - **Practical Component:** Futures market simulation.
- 

### Module 9: Index Swing Trading Across Markets

- **Objective:** Diversify trading across indices and asset classes.
  - **Key Topics:**
    - Swing trading in NIFTY, BANK NIFTY, Forex, and Commodities.
    - Market correlation strategies.
    - Risk mitigation across asset classes.
  - **Practical Component:** Multi-market swing trading exercises.
- 

### Module 10: Trading Psychology Unleashed

- **Objective:** Develop the mindset of a professional trader.
- **Key Topics:**
  - 5 Principles of trading discipline.
  - 7 Rules to overcome emotional biases.
  - Building resilience during market uncertainties.
- **Practical Component:** Psychological self-assessment.
